

base camp

GILLIAN HEVEY | ARCH 681 | PHILIP SPERANZA

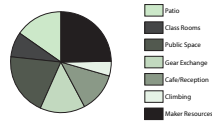

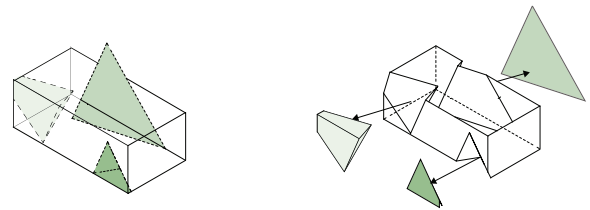

This makerspace in southeast Portland is a base for learning and collaborating on outdoor gear in a supportive and cooperative environment. The space is dynamic, lively, and buzzing with excitement, each member or visitor preparing for their next big adventure. To foster this kind of community the space needs to be open, with enough room for printing, sewing, and table space, but in close enough quarters to force interaction and encourage collaboration.
