

Amanda Kalar – PLE Narrative W11 Midterm

I chose to display my personal learning environment using a bookshelf metaphor, with each shelf representing different categories: 1) personal, 2) physical, and 3) virtual. This helped me visualize the different levels in regards to where I'm getting my information, how, and from whom. After completing this exercise and seeing everything in front of me, I was surprised at how many resources I actually use for learning (and how I take their existence for granted).

I also used the bookshelf metaphor because I still feel firmly rooted in holding physical knowledge in my hands, all the while expanding my learning environment through technological means and advances.
