

RIVER EDGE RENDERING

CONCEPT PROCESS

Ormsi site has an access to Willamette River, which makes it convenient to connect the learning center with river.

Two major massing go along East and West direction, Taking full advantage of sunshine on one hand, at the same time open up view for visitors to appreciate river.

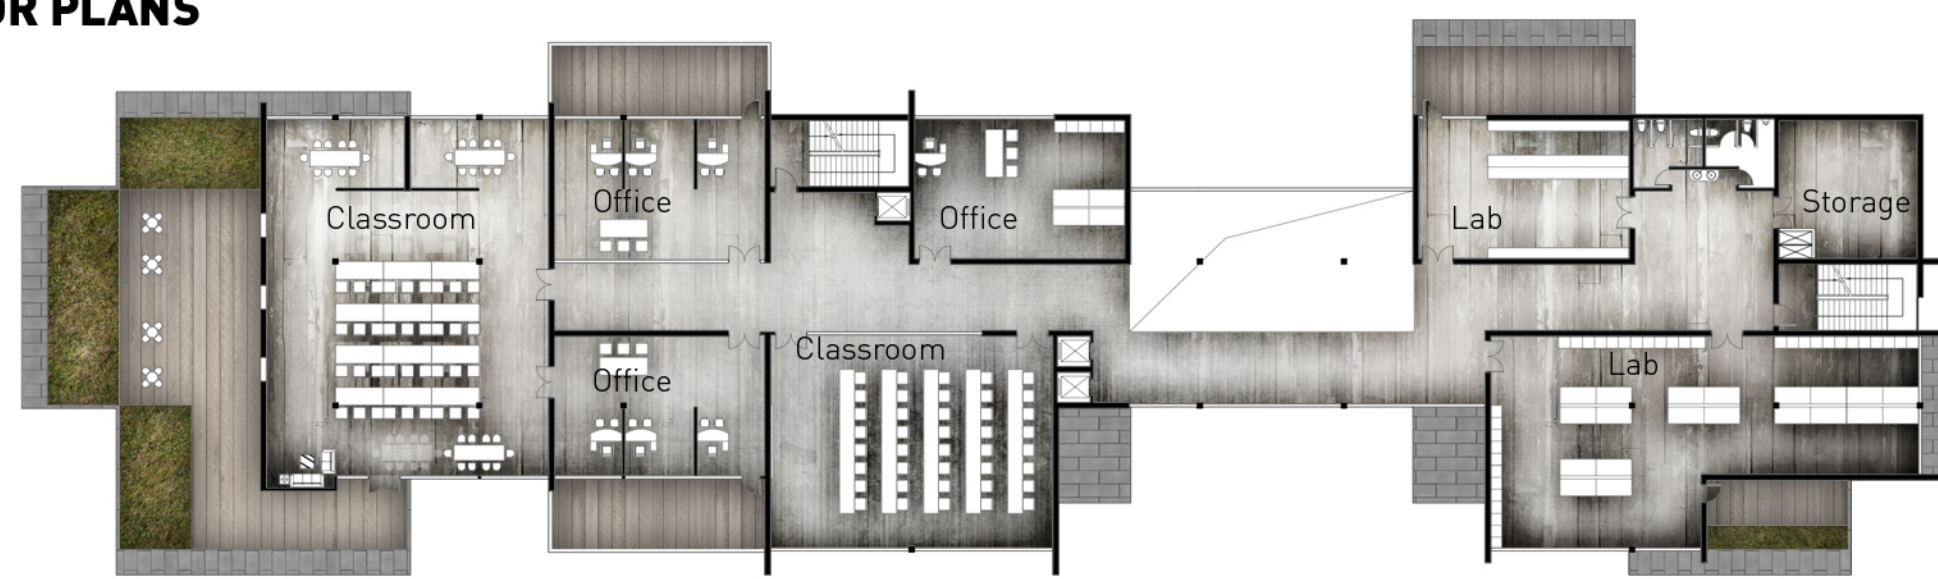

Conncting two massing with a bridge started from 3rd floor, which allows people go underneath it and reach river.

Rotate the South massing to better fit site shape, at the same time encompass a larger public space next to river.

Build the back up terrace facing river to better respect the site.

Pushing and pulling parts of spaces to make more terrace.
