

...Fun lab week with much personal data!

BI 121 Lecture 10

I. **Announcements** Remember to read Lab 5 before Thursday.

Thanks for helping us be well-prepared. Q from last time?

Calculating grade from estimated final. Keys to success? Q?

II. **CVD & Oil Connections** Anti-inflammatory vs. inflammatory?

S&W ch 5

III. **Blood Form & Function** LS ch 11 pp 296-304, 309-12

DC Module 5 + SI Fox + *National Geographic* Lennart Nilsson

A. Formed vs. nonformed/cells vs. plasma fig+tab 11-1

B. Red blood cells/erythrocytes: O₂-carrying
sickle cells, ABO blood typing, Rh factor pp 299-304.

C. White blood cells/leukocytes: Defense/immunity
differential + general functions pp 309-12

D. Platelets/thrombocytes: Initial clotting p 304

IV. **Blood Glucose & Diabetes Mellitus** LS ch 17, DC Module 13

Q? What do I need on the final, if I want to get...?

A? You can actually calculate given assumptions...

e.g., 62 for midterm & desire $\geq B-$ (assume ≥ 80)

**Assume 100% for lecture (20% of grade)
+ lab attendance & participation (20% of grade!)**

Hope for? MT Lecture Lab

$$X = [80 - ((0.3 \times 62) + (0.2 \times 100) + (0.2 \times 100))] / 0.3$$

$$X = [80 - [(18.6) + (20) + (20)]] / 0.3$$

$$X = [21.4] / 0.3 = 71.3$$

Need this on final
for *B-* for course!

...Fortunately, lecture & lab attendance buffer the grade!

...I ♥ U of O!

Students who succeed are usually those who:

- (1) **Attend** class regularly
- (2) **Ask** questions
- (3) **Come to** office hours & problem-solving sessions
- (4) **Study** outside class both alone & in study groups
- (5) **Seek** to understand methods & overarching principles/concepts rather than specific answers
- (6) **Teach** or tutor others &
- (7) **Discuss** concepts informally with fellow students.

Science Teaching Reconsidered, National Academy Press, 1997.

Essential Fatty Acids: Ω -6 Linoleic & Ω -3 Linolenic Acids

Linoleic \rightarrow Arachadonic Acid \rightarrow Inflammatory Cascade

Linolenic \rightarrow EPA, DHA \rightarrow Anti-inflammatory

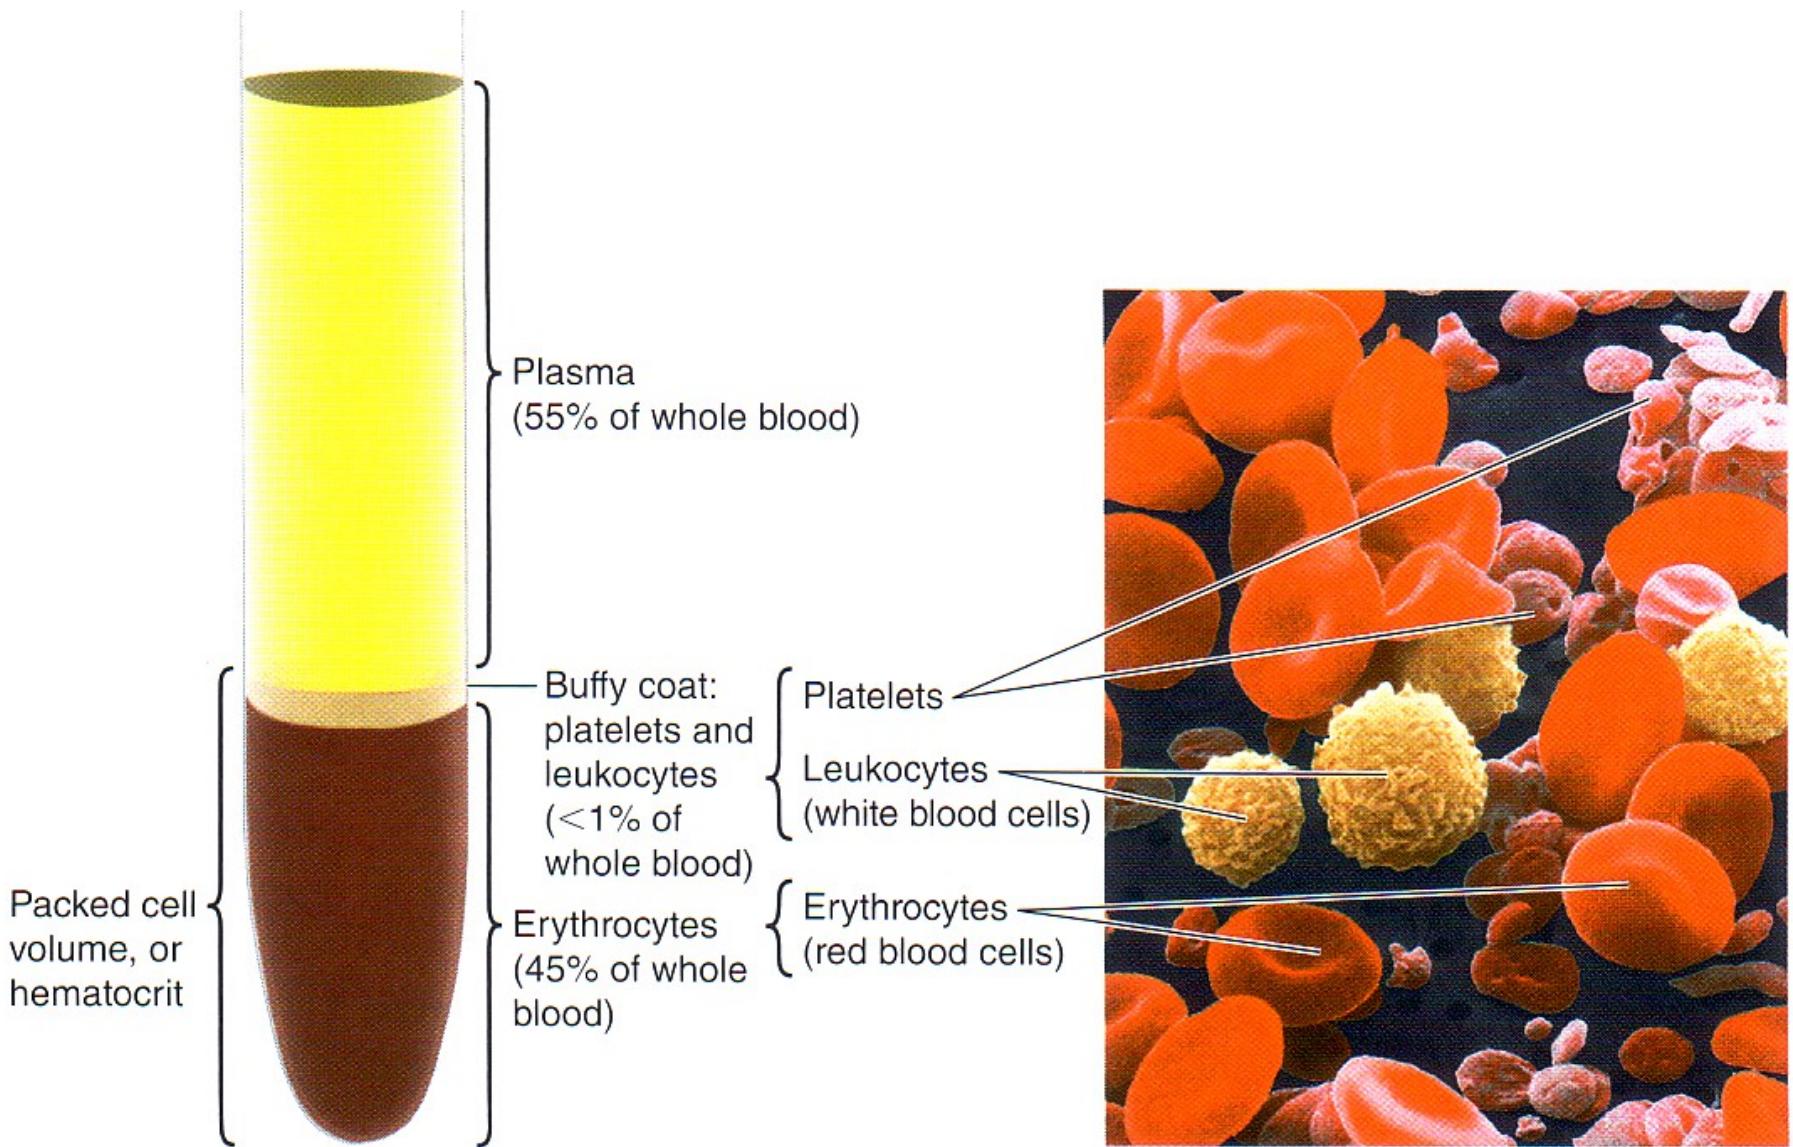

*Deep cold
water fish
are fabulous
sources of
 Ω -3 fatty
acids!*

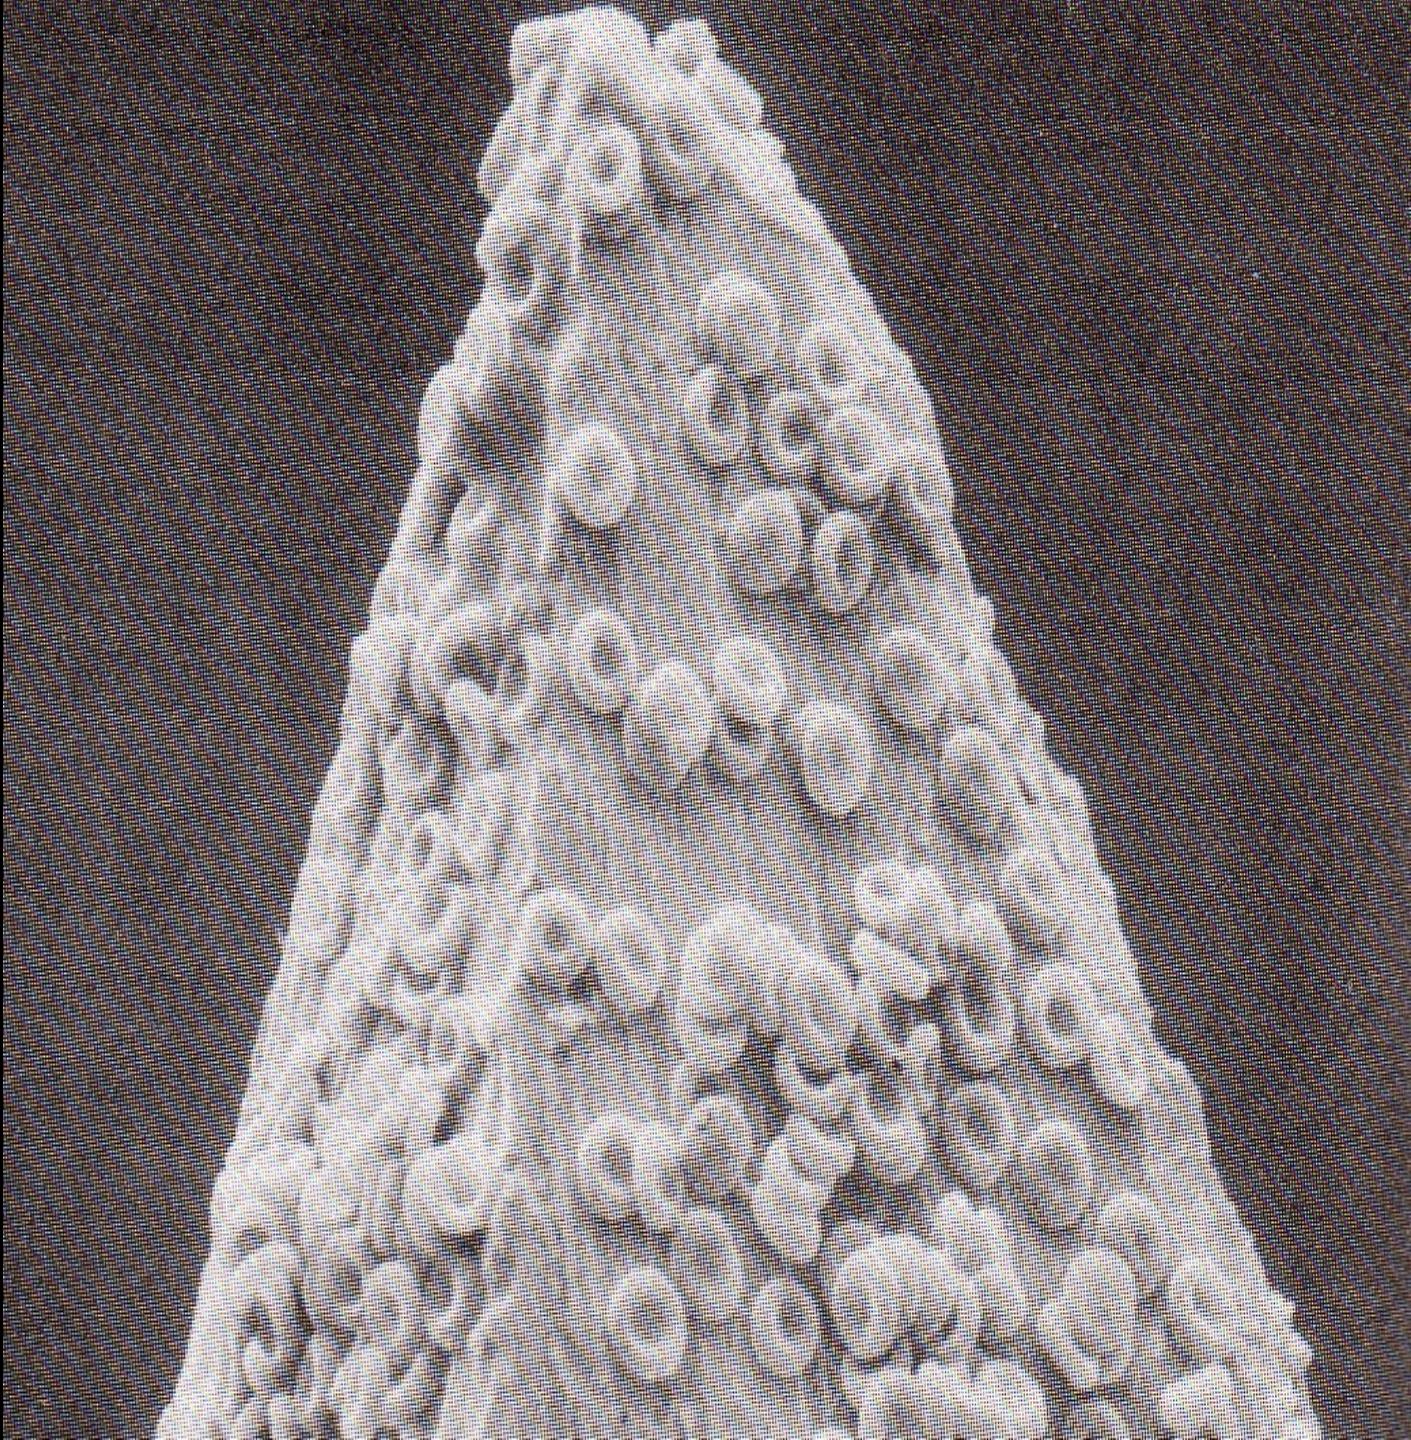

Break for discussion/questions!

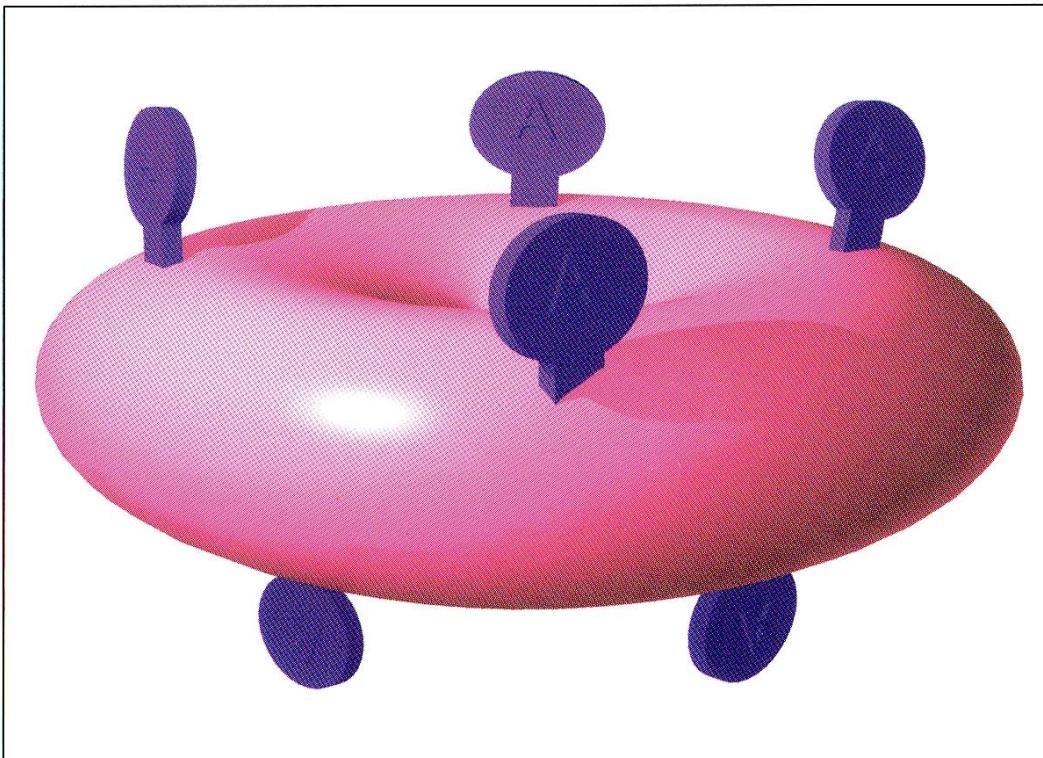

What's in Blood? Plasma & Blood Cells

A

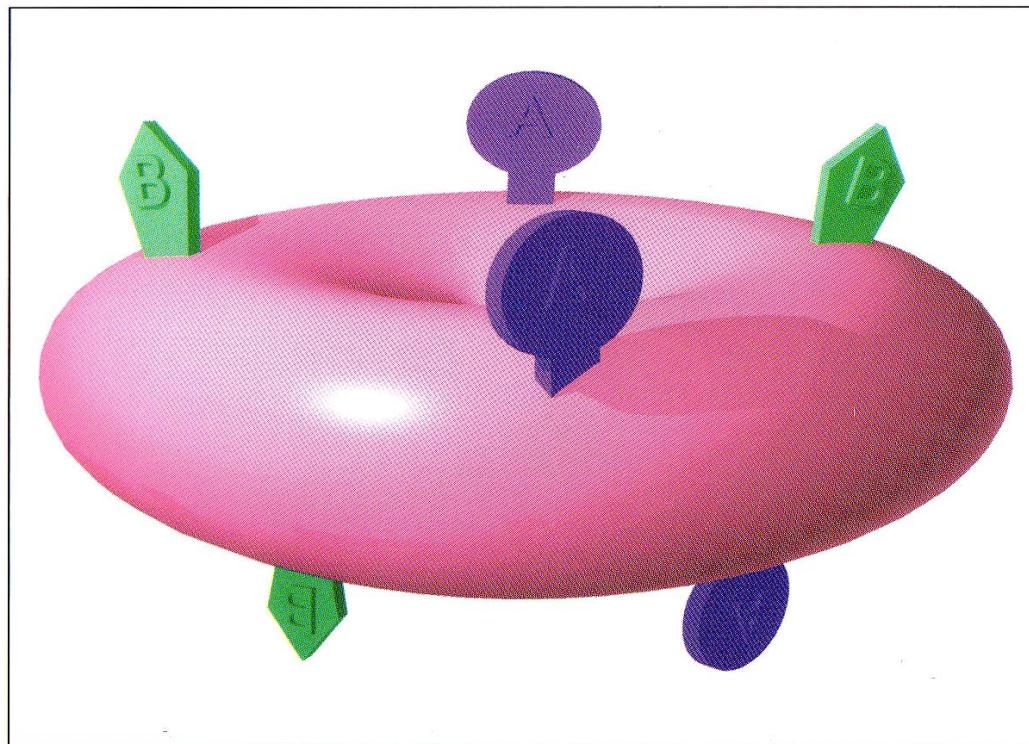

A Antigens
(Agglutinogens)

B

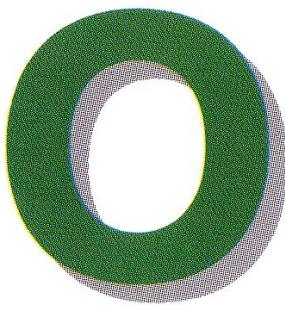

B Antigens
(Agglutinogens)

AB

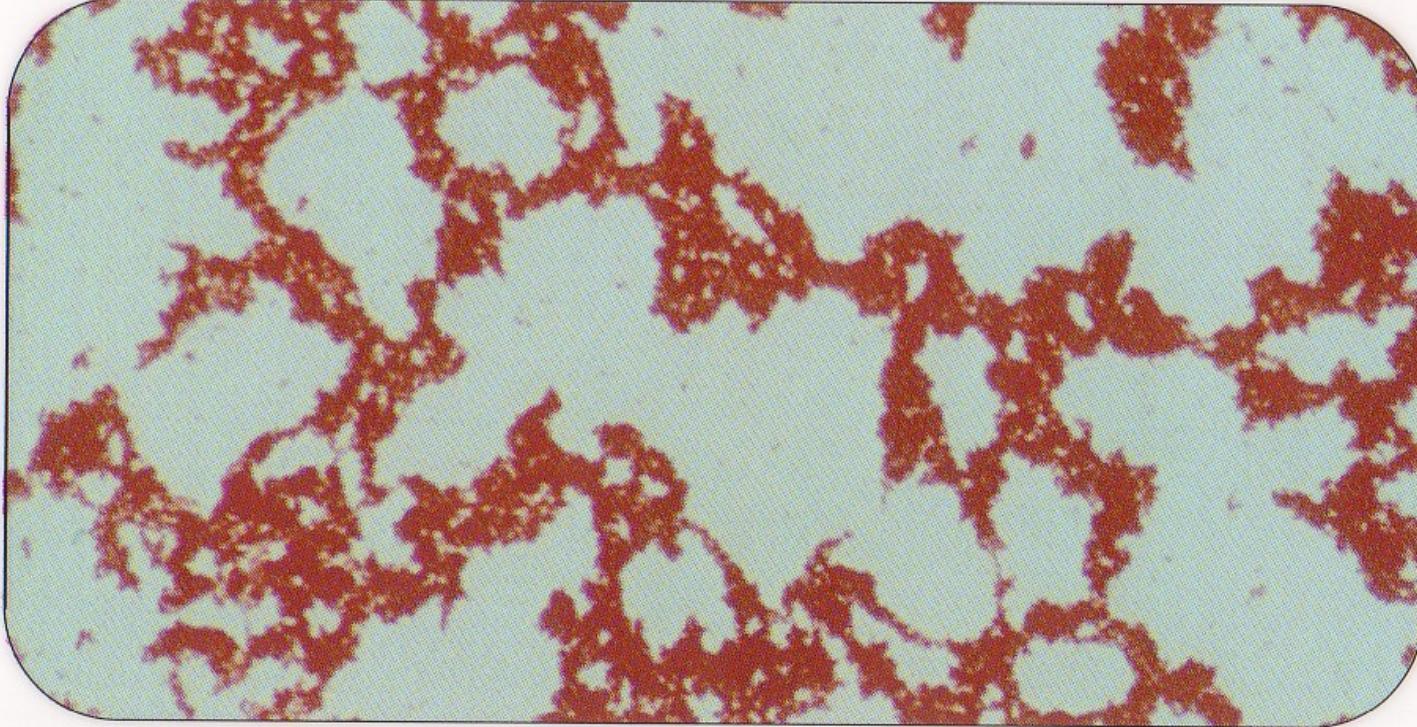

A & B Antigens
(Agglutinogens)

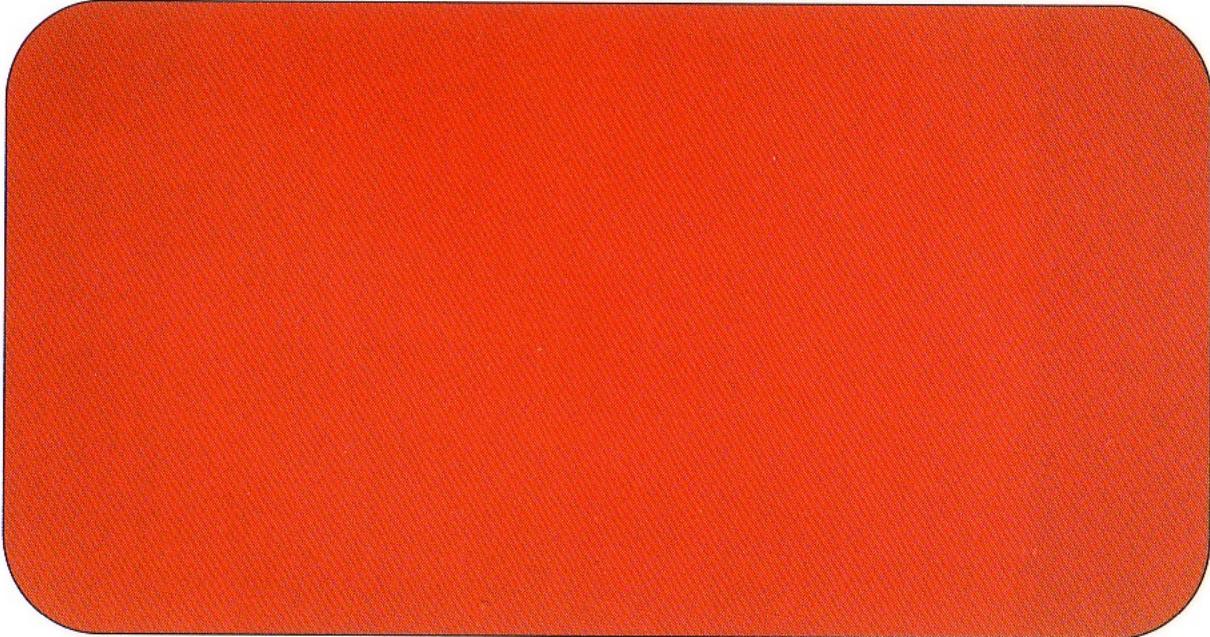

No Antigens
(Agglutinogens)

A Antibodies
(Agglutinins)

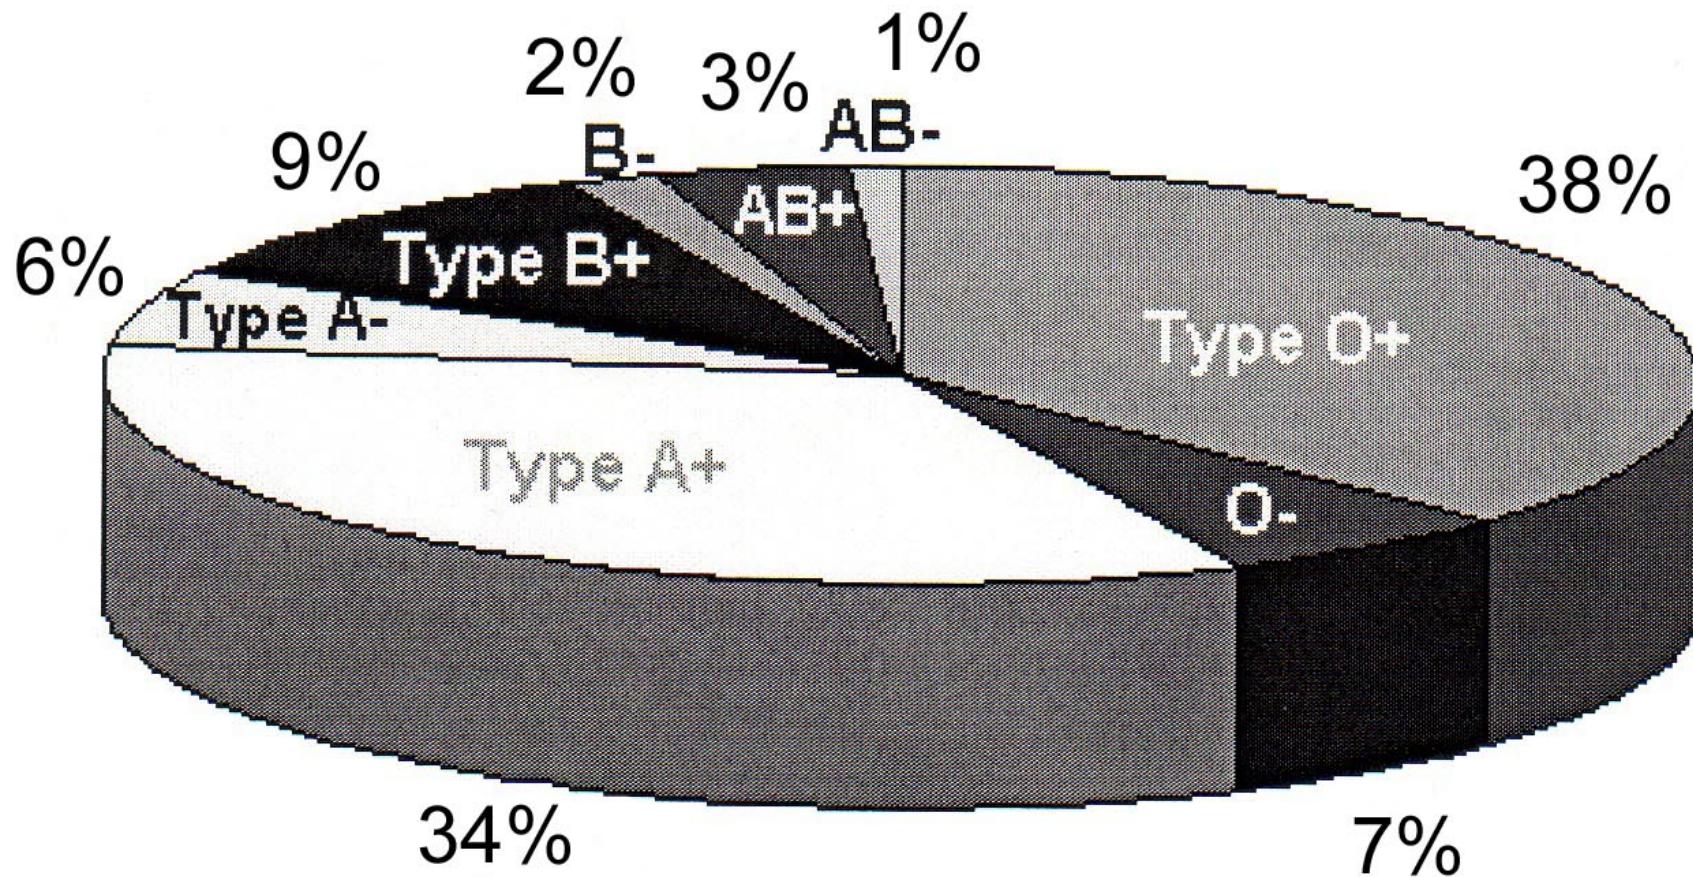

Clumping with
anti-A serum

No Clumping with
anti-A serum

Blood Type Distribution, General Population

Erythroblastosis Fetalis?

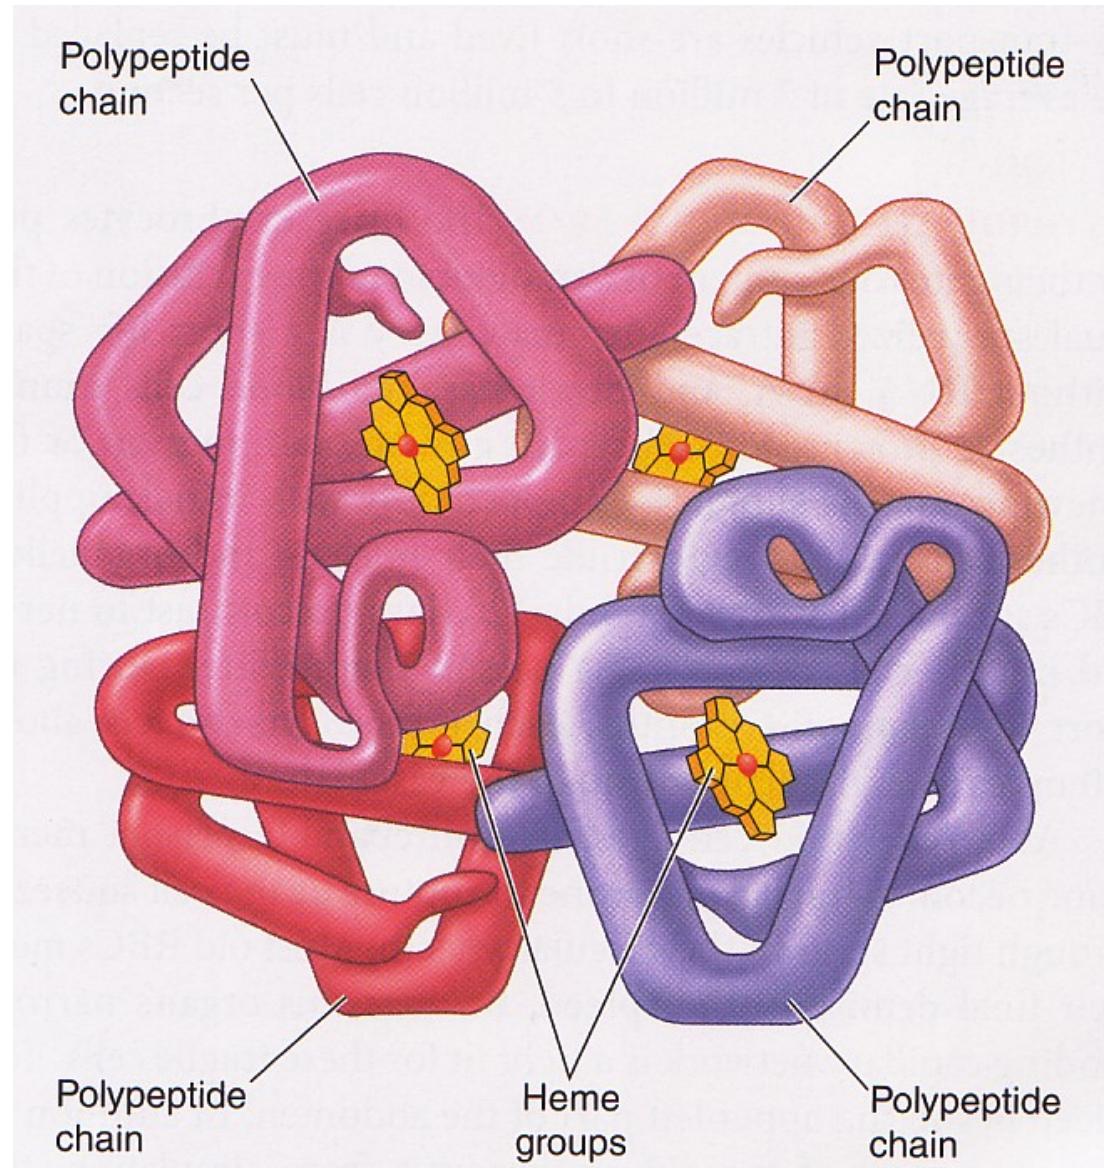

eg, Rh- mom
 Rh+ baby

LS 2012 fig 11-6

Formation of the Platelet Plug

1 Platelets adhere to and are activated by exposed collagen at the site of vessel injury.

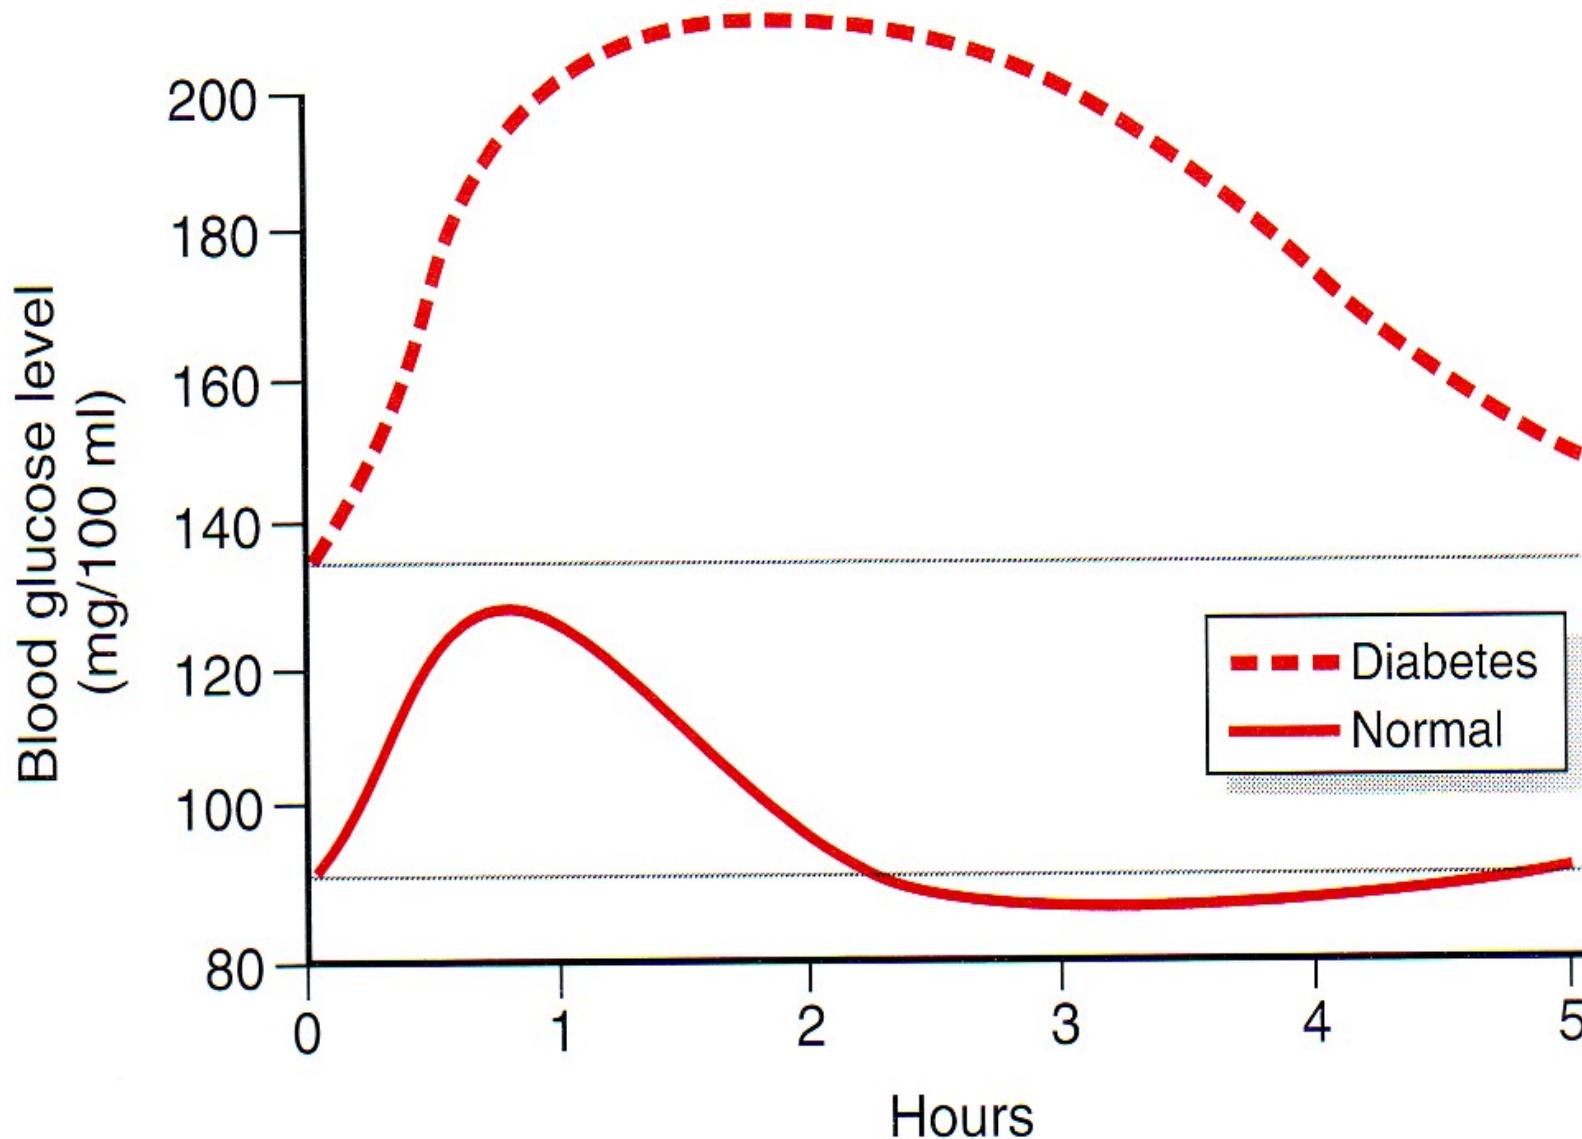

2 Activated platelets release ADP.

3 ADP activates other platelets passing by.

4 Newly activated platelets aggregate onto growing platelet plug and release even more platelet-attracting chemicals.

5 Normal (uninjured) endothelium releases prostacyclin and nitric oxide, which inhibit platelet aggregation, so platelet plug is confined to site of injury.

Diabetic & Normal Response to Glucose Load

Guyton & Hall 2000

Glucose: *Sugar in Blood*

Normal: 70-99

Pre-Diabetes: 100-125
Diabetes: ≥ 126 mg/dL

Proinsulin with C-Connecting Peptide

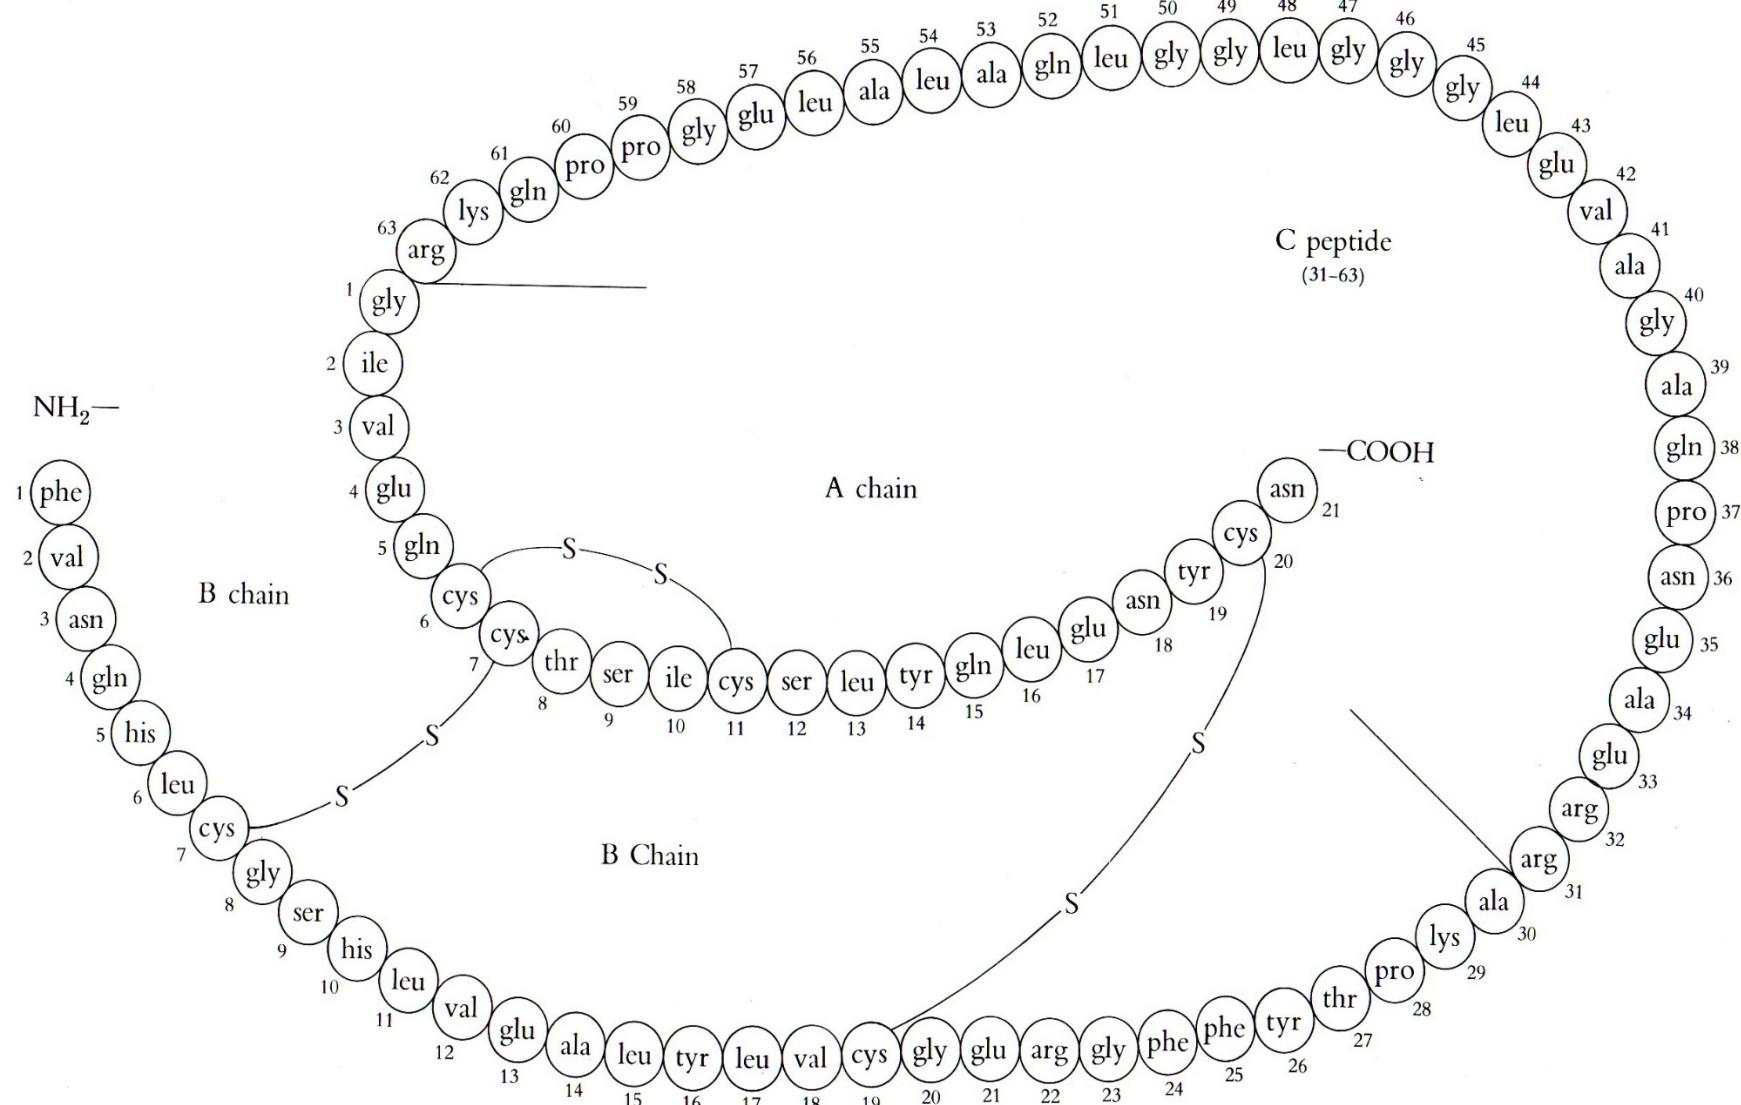

FIG. 10-4. Amino acid sequence of a mammalian proinsulin molecule. Note how the insulin molecule can be formed by cleaving this polypeptide chain at two locations to liberate the C peptide.

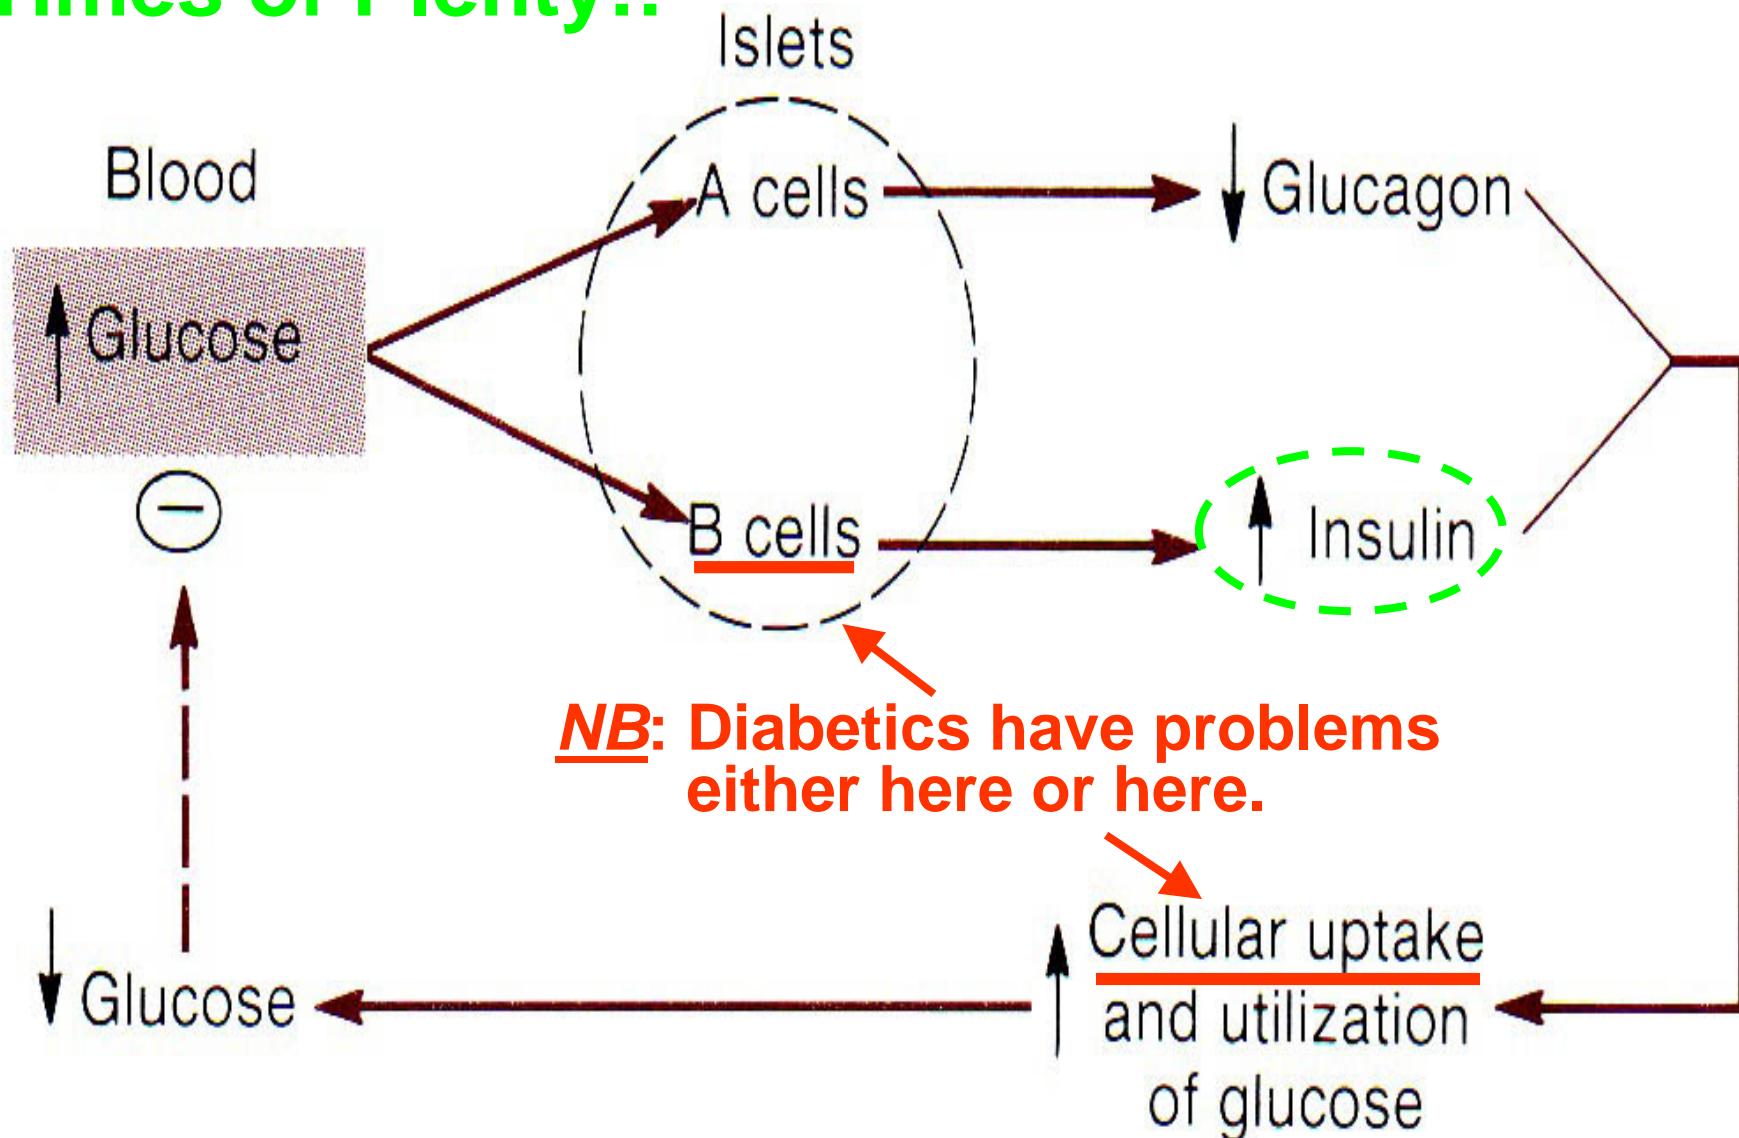

**TABLE
4-7**

Warning Signs of Diabetes

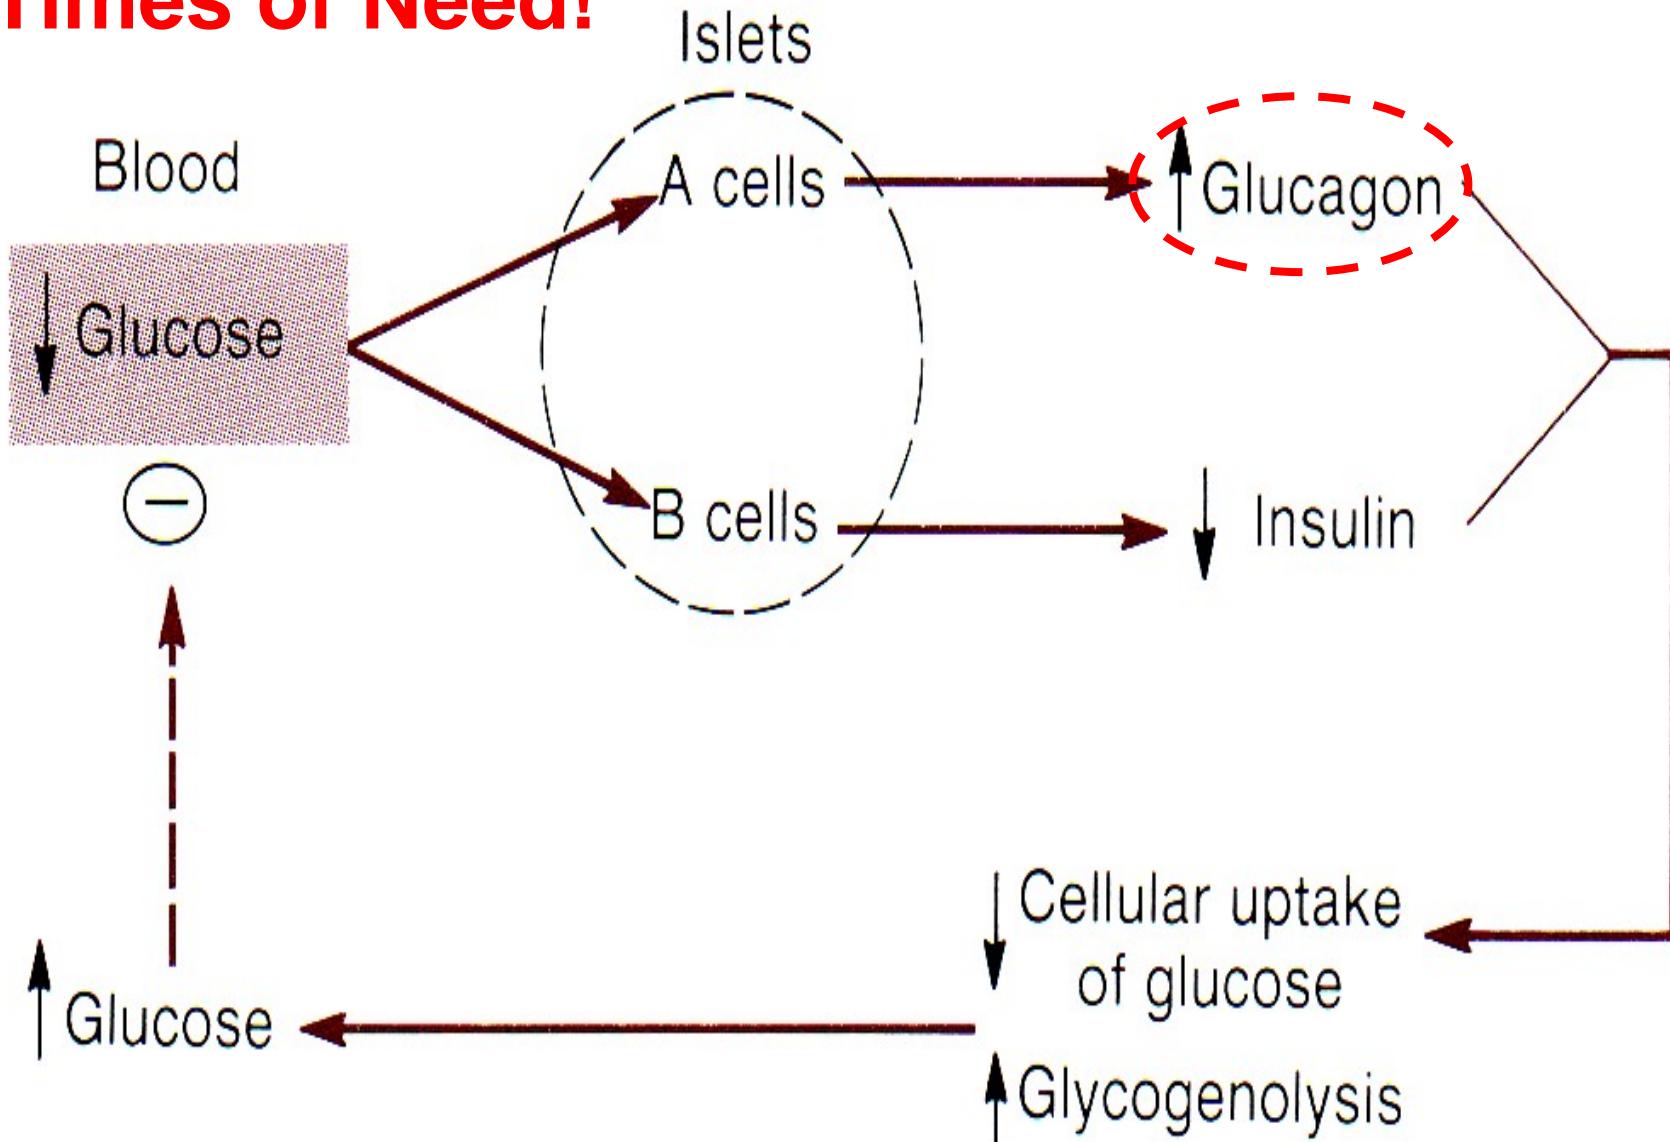

These signs appear reliably in type 1 diabetes and, often, in the later stages of type 2 diabetes.

- Excessive urination and thirst
- Glucose in the urine
- Weight loss with nausea, easy tiring, weakness, or irritability
- Cravings for food, especially for sweets
- Frequent infections of the skin, gums, vagina, or urinary tract
- Vision disturbances; blurred vision
- Pain in the legs, feet, or fingers
- Slow healing of cuts and bruises
- Itching
- Drowsiness
- Abnormally high glucose in the blood

Times of Plenty!!

Times of Need!

Diabetics must constantly juggle diet, exercise & medication to control blood glucose!

Like others, diabetics benefit from whole grains, vegetables, fruits, legumes & non-/low-fat milk products!
