

G. Waples

BI 121 Lecture 1

- I. Announcements**: Please check & sign attendance roster. Not on list? See Pat during break/> class. *Lab 1 Histology* tomorrow in 130 HUE: 12 n & 1 pm sections. Much fun!!
- II. Introduction**: Staff, office hr, required sources, course overview, grading, expectations & success. Q?
- III. Human Physiology** LS ch 1, DC Module 1
 - A. What? cf: Anatomy LS p 1
 - B. Where? Body Levels of Organization LS pp1-6, DC pp1-5
 - C. How? Different Study Approaches LS p 1
 - D. Why? Security+Decision-Making Power LS p xxi, DC p v
- IV. Homeostasis** LS ch 1, DC Module 1
 - A. What? Maintenance of ECF LS p 8
 - B. Where? ECF = Plasma + Interstitium LS fig 1-4 p 8
 - C. How? Simplified Homeostatic Model cf: LS fig 1-7 p 14
Balances LS p 9, DC pp 5-6
 - D. Why? Cell survival! LS fig 1-5 p 9, DC p 5

HEALTH LETTER®
CENTER FOR SCIENCE IN THE PUBLIC INTEREST

Eat Real, America!

"With the right food choices, physical activity, and not smoking, we could prevent about 80 percent of heart disease, about 90 percent of diabetes, and 70 percent of stroke," says Walter Willett, chair of the nutrition department at the Harvard School of Public Health in Boston. "Those are the three pillars. They really do make a difference."

The right food choices are simple: Eat less red meat, sweets, refined grains, and salt, and drink fewer sugary beverages. Replace unhealthy foods with vegetables, fruit, beans, and whole grains, and with smaller amounts of fish, poultry, and low-fat dairy. Those foods aren't just good for our health. They can also help protect the Earth.

Here's why—and how—to eat real.

Continued on page 3.

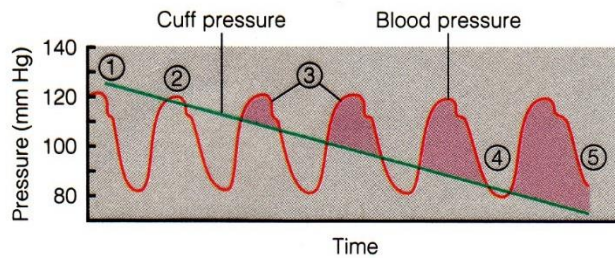

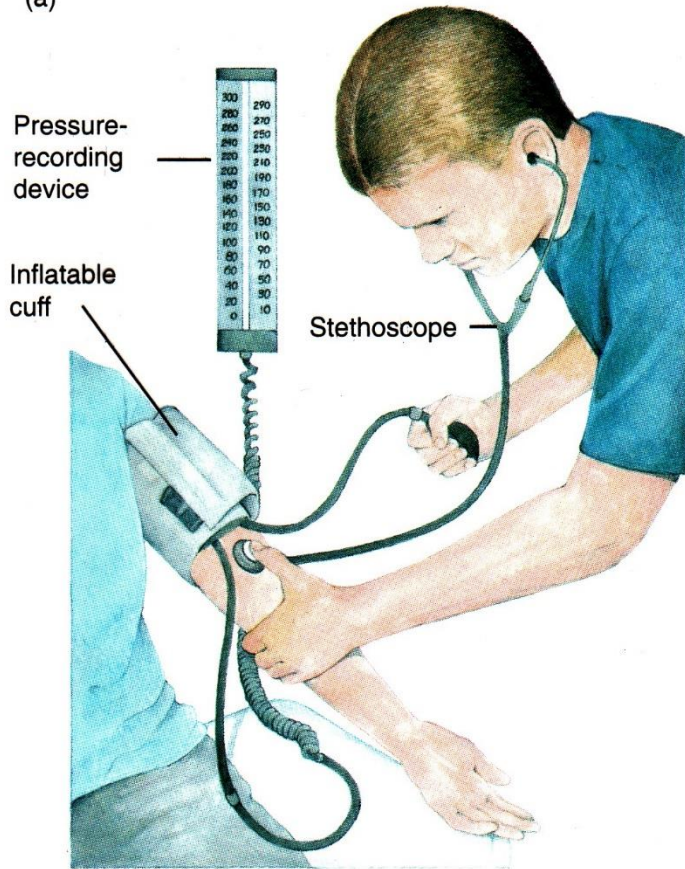

With the right food choices, physical activity, and not smoking, we could prevent about ~90% of diabetes, 80% of heart disease & 70% of stroke!

(a)

(b)

(c) When blood pressure is 120/80:

Cuff pressure is greater than 120 mm Hg.
No blood flows through vessel.
No sound is heard.

Cuff pressure is between 120 and 80 mm Hg.
Blood flow through vessel is turbulent whenever blood pressure exceeds cuff pressure.
Intermittent sounds are heard as blood pressure fluctuates throughout cardiac cycle.

Cuff pressure is less than 80 mm Hg.
Blood flows through vessel in smooth, laminar fashion.
No sound is heard.

What's in Blood? Plasma & Blood Cells

AB

Health risks of e-cigarettes emerge

Vaping pollutes lungs with toxic chemicals and may even make antibiotic-resistant bacteria harder to kill

By JANET RALOFF 4:31PM, JUNE 3, 2014

👉😊...I ♥ U of O!

Students who succeed are usually those who:

- (1) **Attend** class regularly
- (2) **Ask** questions
- (3) **Come** to office hours & problem-solving sessions
- (4) **Study** outside class both alone & in study groups
- (5) **Seek** to understand methods & overarching principles/concepts rather than specific answers
- (6) **Teach** or tutor others &
- (7) **Discuss** concepts informally with fellow students.

Science Teaching Reconsidered, National Academy Press, 1997.

ANATOMY
STRUCTURE
WHAT?
WHERE?

VS

PHYSIOLOGY

VS

FUNCTION

VS

HOW?

VS

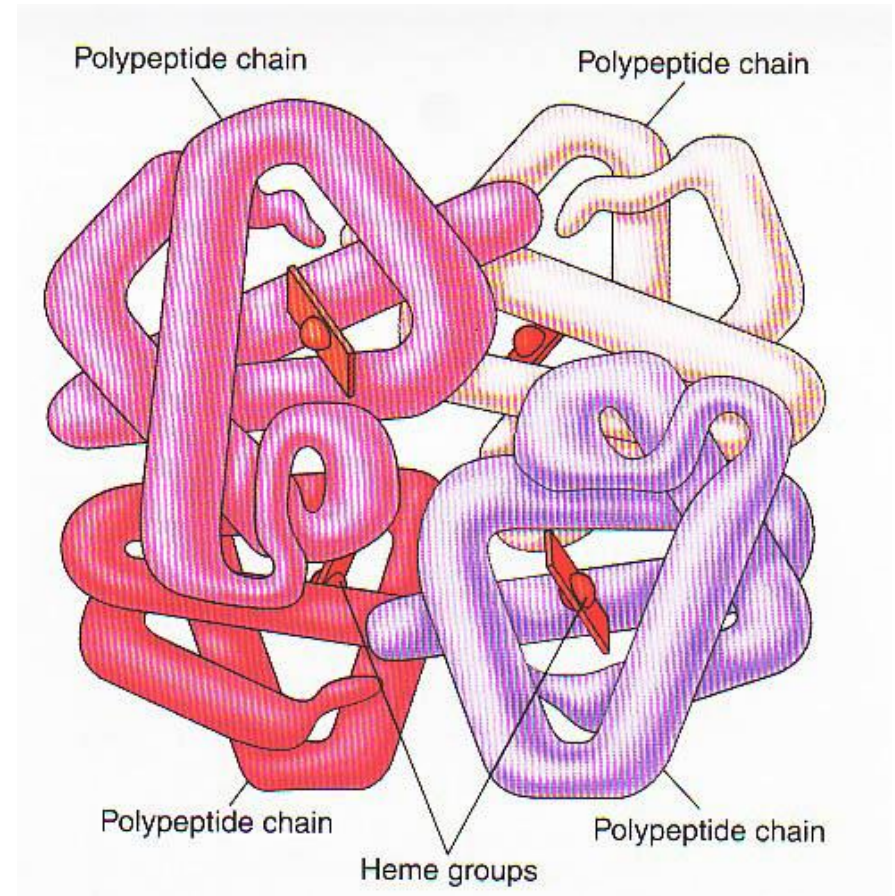

WHY?

VS

Structure begets *function*!
Structure gives rise to *function*!
Structure & *function* are inseparable!

Knee Structure-Function?

Preoperative Diagnoses: R Knee

Degenerative Joint Disease (DJD) = arthritis

Varus malalignment = bow-leg

Procedures:

Arthroscopy & microfracture

High Tibial Osteotomy (HTO)

Packing bone graft substitute

Blocks/Medications:

Femoral n. block

General anesthesia

IV Morphine, Oral Oxycotin + Oxycodone,

Tylenol, Injectable Lovenox (enoxaparin Na)

William Sterett, MD
Ben Hogan, PAC
Vail Summit Orthopedics

R knee medial meniscus cleavage & tear

R knee lateral compartment in good shape!

1. Arthroscopy clean-up

2. Debridement complete

3. Microfracture with awl

4. Punctuate bleeding

Further bleeding to create superclot!

High-Tibial Osteotomy (HTO) to Realign the Joint

1. Oscillating saw cut

2. R plate/scaffolding insert

3. Align, stabilize w/screws & pack defect

Post-Operative Reality: 10 d injectable anti-coagulant, 3 wk oral anti-coagulant, 4 wk CPM machine, non-wt bearing 8 wk, 12 wk PT, 3-5 d/wk,...

CPM ≡ Torture Device

Break for discussion/questions!

Body Levels of Organization

1. Molecular

2. Cellular

3. Tissue

4. Organ

5. System

Entire Organism,
like you & me!

Nerve conducts

Muscle contracts

Connective connects!!

Epithelial covers

Epithelial tissue gives rise to glands: (a) exocrine & (b) endocrine

(a) Exocrine gland

(b) Endocrine gland

**Epithelial
tissue in
frog skin
developing
into an
exocrine
gland!**

Organs are made up ≥ 2 tissue types

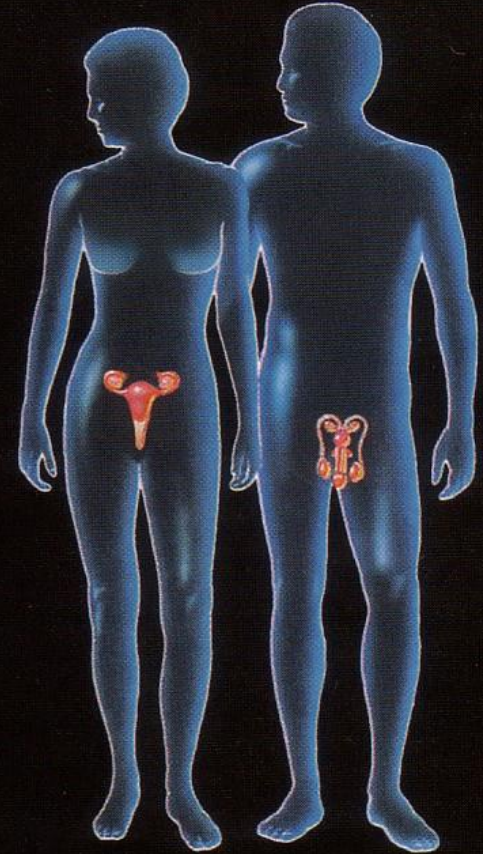

Organ:
Body structure that integrates different tissues and carries out a specific function

Which body systems?

Which body systems?

Why study human physiology?

KNOWLEDGE IS POWER!!!

**Thomas Hobbes of Malmesbury
English Philosopher, 1658**

Homeostasis is essential for cell survival!

Maintenance of a relative constancy in the Internal environment = ECF = fluid outside of cells

**milieu
interieur?**

Claude Bernard

**100 trillion
cells working
intimately**

Walter B. Cannon

Where is extracellular fluid?

Where is extracellular fluid?

As long as between/outside cells, **ECF everywhere?**

ECF = Extracellular

Plasma
(within CV System)

ICF = Intracellular

Interstitium
(eg, between
muscle cells)

*Homeostasis
or
Homeokinesis?*
