Biology 410/510  Neural Basis of Cognition

Instructor: Santiago Jaramillo  
Office: LISB 215  
E-mail: sjara@uoregon.edu

NOTE: This is a tentative syllabus. The final version will be accessible via Canvas.

Course description
The course will examine the neural mechanisms that mediate cognitive processes such as attention, memory and decision making. We will focus on studies that use animal models to relate the activity of single neurons to cognition. The course is intended to bridge the gap between sensory physiology and cognitive neuroscience. The format of the course includes lectures and activities that introduce each topic, followed by analysis of primary research literature. Students are expected to have a working knowledge of basic neuroanatomy and neurophysiology.

Course pre-requisites
BI353 – Sensory physiology, BI360 – Neurobiology, or equivalent.

Learning objectives
1. Gain a working knowledge of modern experimental approaches for studying cognition in animal models.  
2. Identify the major gaps in our understanding of the neural mechanisms of cognition.  
3. Become a critical reader of scientific research articles in systems neuroscience.  
4. Develop the ability to formulate hypotheses about the neural basis of cognitive processes.  
5. Become proficient at designing experiments to test hypotheses about the mechanistic bases of cognitive processes.  
6. Learn to give a concise and compelling oral presentation that identifies a scientific question, proposes a hypothetical answer to this question, and lays out a novel strategy to test this hypothesis.
Course calendar

1. **Introduction**
   1. Introduction to cognition, animal models, and course overview.

2. **Perception**
   1. HOLIDAY

3. **Decision-making I**
   1. Reflexes vs. decisions, integration of evidence, confidence.

4. **Decision-making II**
   1. Foraging, exploration vs. exploitation, value.

5. **Attention**
   1. Spatial attention, feature attention.

6. **Multiple modalities**
   1. Multisensory integration and cross-modal attention.

7. **Learning**
   1. LTP/LTD, reinforcement, expectation.

8. **Memory**
   1. Memory engram, reactivation

9. **Thinking**

10. **Wrap up**
    1. *Additional student presentations*
    2. Wrap-up: assessment of course objectives.
**Students with disabilities**

If you have a documented disability and anticipate needing accommodations in this course, please make arrangements to meet with me. Please request that the Counselor for Students with Disabilities send a letter verifying your disability.

**Academic Honesty**

Group discussions outside of class are encouraged. However, all work submitted as part of this course must be your own. The use of sources must be properly acknowledged. Copying or paraphrasing information from any source without citation is plagiarism. For more information, see [http://library.uoregon.edu/guides/plagiarism/students/index.html](http://library.uoregon.edu/guides/plagiarism/students/index.html)

The consequences of academic dishonesty will be taken seriously (e.g., an 'F' in the course and a report to the Office of Student Conduct) and are noted on student disciplinary records. If you are in doubt regarding any aspect of these issues, please come and speak with me.
