How to add a Docuseek2 video to Canvas:

Docuseek2 is a streaming video service that the University of Oregon Libraries has licensed. Docuseek2 has over 800 films and documentaries from film makers including Bullfrog Films, Collective Eye Films, Icarus Films and others. This is a great way to “flip” your classroom; students watch pertinent videos at their convenience, saving scarce, valuable classroom time for lecture and discussion.

Films, documentaries and more information on Docuseek2’s Streaming Service can be found here: https://library.uoregon.edu/node/5181

To link a video in Canvas:

1. Select your film or documentary from Docuseek2.
2. Above the video, click the Link To/Embed button. A pop-up window will appear with the 35-character string we need for the link (highlighted below).

![Link To/Embed button]

3. Log into Canvas, go to your course and the assignment, discussion, quiz, or page you would like to add your video to. You can link a Docuseek2 video into any Canvas tool with a rich text editor.
4. Select Edit
5. To link the video, click on the blue HTML Editor link. This will change the text box from a rich text editor to an html editor.
6. Copy and paste the following *suggested* wording and *requisite* html code into the html editor:

```html
<p><a title="docuseek2" href="https://docuseek2-com.libproxy.uoregon.edu/view/check/1427564236100000048510000077/0/16" target="_blank">INPUT_VIDEO_NAME_HERE</a></p>
```

7. Replace the highlighted 35-character identifier with the one associated with your video.

8. Next, within the code, replace the red-colored text that says “INPUT_VIDEO_NAME_HERE” with the name of your video.

9. Click the blue **save** button and you will have a page with your video title as a link to the new window in which your video will open and play. This enables both on and off-campus viewing. You can now finish editing your assignment, discussion, quiz, or page and add any further instructions directly into the rich text editor without affecting the video.
