ANNOUNCEMENT
Available Student Positions – Cartography and GIS

The InfoGraphics Lab, in the Geography Department, is seeking student applicants with interests in Map Design, Cartography and Geographic Information Systems (GIS). The InfoGraphics Lab is nationally known as a leader in; the publication of high quality printed atlases and maps, designing innovative GIS systems, and developing cutting-edge, award-winning web and mobile applications. Positions are available for 10-20 hours per week.

Qualifications: Applicants should have a strong interest in cartography, design, GIS, and a desire to learn while working on real-world mapping applications. We are looking for candidates that are highly motivated and demonstrate the ability to think creatively, solve problems, and work well in a collaborative setting.

Students working in the Lab enjoy a professional working environment where they gain experience in a variety of GIS, mapping, and graphic design software packages/environments including; Esri ArcGIS, Adobe Creative Suite, and other programs. Previous experience using these software applications is desirable – but not required. Students may also have the opportunity to be involved with custom mapping application development. Previous experience in mobile or web programming is also desirable – but not required.

Recent student employees have graduated to well-paying jobs at Esri, The New York Times, National Park Service, Apple, Google, as well as a variety of federal, state, and local government agencies and private companies.

Potential applicants are encouraged to visit our website – http://infographics.uoregon.edu – to learn more about the Lab.

Review of applications will begin on March 28, 2016 and continue until openings are filled.

To apply, e-mail a resume and cover letter to:
Jim Meacham, Executive Director
InfoGraphics Lab, Department of Geography, University of Oregon
Email: jmeacham@uoregon.edu

Work Study Qualified Students are encouraged to apply
