GIS Technician Opportunity

Do you have a background in Geographic Information Systems? Are you or anyone you know looking for an opportunity to utilize your GIS skills? We are looking for recent grads that are eager and excited to start their career in the technical industry of GIS. This is the perfect opportunity to gain experience and work for one of the world’s leading information technology companies.

Key Qualifications

Required:
- Deep understanding of spatial concepts and theory
- Experience with Geographic Information Systems, proprietary or open source
- Detail-oriented
- Strong web-research skills, including the use of web-based maps
- Adept at working with large data sets with an ability to identify patterns
- Demonstrated ability to work independently, as well as in small and large cross functional teams
- Strong computer literacy
- Strong verbal and written communication skills

Highly Desired:
- 1+ year of experience in geospatial data analysis or map quality evaluation
- Bachelor degree in Geography, GIS, Computer Science or similar
- Ability to draw conclusions from data and recommend actions
- Experience querying databases using SQL
- Experience scripting with Python
- Experience with other programming languages
- Foreign language experience

Description:
Responsible for content analysis, validation, cleansing, collection and reporting. Analyze and validate data content and assemble new content from various sources, including databases, files/spreadsheets, and websites. Respond to data inquiries from various groups within an organization. Create and publish regularly scheduled and/or ad hoc reports as needed

Education:
BS/BA or MS/MA in Geography, GIS, or Engineering
