Veterinary School Preparation at the University of Oregon

Did you know?

- Veterinarians provide healthcare to pets, livestock, zoo animals, and laboratory animals.
- Although veterinarians focus mainly on animal health and wellness, many use their expertise to protect humans against diseases carried by animals.
- Veterinarians have many career options outside of private practice, including the federal government and US Army. Organizations such as the Centers for Disease Control (CDC), Food and Drug Administration (FDA), and National Institutes of Health (NIH) all employ veterinarians.
- There are 30 veterinary medicine programs in the United States.

Veterinary Medicine Application Preparation

- Completing the prerequisite courses is just one aspect of the process. You must also have a well-rounded application consisting of experience (shadowing, volunteer work, experience with animals, life experience, etc.), letters of recommendation, GRE scores, a strong admissions essay, and interview.
- Some veterinary medicine programs allow applicants to apply without a bachelor’s degree, but applicants who have a bachelor’s degree are more competitive.
- State residency is an important factor to consider when choosing programs. The likelihood of acceptance is greatest at the public institution in the state where you are a resident.

Advising

For more information and individualized academic planning, call or visit the Teaching and Learning Center (541-346-3226, 68 PLC) to schedule an appointment with a health professions advisor.
Sample 4-Year Plan

The chart below illustrates one way veterinary school prerequisites \(^1\) can fit into a 4-year plan. Keep in mind that a good graduation plan is as unique as the student following it. Math placement, major, transfer credits, application timeline, and other factors will help shape your own decisions, and health professions advisors are here to help along the way!
