The 2015 Lyceum Design Competition asked, “Can an aging city and its aging population be addressed by the same architectural solution?” To design for active aging, the studio visited a high-end continuing-care retirement community, affordable multi-generational housing and ecologically designed buildings.

First Place winner INTEGRATE ME SOFTLY by Vincent Jiawei Ma transforms the Empire State Building into a passively ventilated vertical city by eroding the envelope and establishing nodes and links. It seeds a green tower network through the city.
REJUVENATION LYCEUM COMPETITION WINNERS  Fall studio 2014

Merit Award winner AGE IN PLACE by Haley Davis proposes a lifelong home that can adapt to evolving household sizes and move to new settings. Arrival and departure of units become community events.
