COVER LETTER

Architectural Company / studio

U.S.A.

February 15, 2015

Dear Sir/Madam,

This is Xing Hua, senior chief architect from East China Architectural Design Group Co. Ltd (former Shanghai Xiandai Architectural Design Group Co. Ltd.). I respectfully submit this letter of interest to apply for continuing professional education and development opportunities at your company.

I have a keen interest in arts and designs since childhood. After graduation with a Bachelor's Degree in Architectural Design from Hunan University in 2004, I started to work as an assistant architect at Chang Zhou Architectural Design Institute, where I obtained a lot of hands-on professional experience through multiple architectural designing projects and reinforced knowledge learnt from classrooms. In 2005, I joined East China Architectural Design Group Co. Ltd (former Shanghai Xiandai Architectural Design Group Co. Ltd.), and this is the place where I truly set out on my career journey. During the past 10 years, I've participated in nearly 100 architectural design and construction projects for both commercial and residential clients with various budgets (up to **\$8 billion**) and scales (up to **2,500,000 m²**). My passions in this profession, my creative proposals, together with my continuous hard work have brought me numerous successful projects and awards during the past years and I was promoted to Senior Chief Architect in 2011. Ever since then, I began to lead my own teams (with sizes up to 20 people) for project developments and I've obtained opportunities to participate in the work at all phases during the Design-Bid-Build (DBB) process. Please see my resume for a list of selective projects I've led/completed; and you may refer to the "Project Album" I submitted for some sample pictures.

After 10 years' involvement in the architecture and construction profession, I have accumulated exceptional skills and experience in planning, detailing, designing and coordinating projects in both public and private sectors. However, I'm not satisfied. I know there's a lot more for me to learn and I'm eager to further my knowledge and ability that are necessary to execute creative ideas and conceptualize/develop operational architectural solutions for both residential and commercial clients.

Being the world-leading country in almost every area of advanced sciences and arts, and the home to countless world-famous architects, design firms, and architecture works, the United States has always been my dream place to pursue continuing education. It'll be a precious experience to witness and learn how creative ideas are nurtured into smart solutions to assist people's daily life. And as an architect, I'm very interested in exploring different architectural styles and design perspectives all over the world, which are affected by country-specific cultures. I believe one can always learn more from personal experiences than textbooks or photographs. An onsite education opportunity in the U.S. is, therefore, very attractive to me.

Thank you very much for your time and assistance. In addition to this letter, I've also submitted a copy of my resume as well as a project album as supporting documents. Please feel free to contact me if any other information is needed. I can be reached by email huaxing1019@gmail.com or by phone (626)6984683

Thank you again and your favorable consideration towards my application is highly appreciated. I'm looking forward to hearing from you soon.

Sincerely yours,

Hua,Xing (Max)

Senior Chief Architect
East China Architectural Design Group Co. Ltd
Room 610, 975 Charenlton Street
Engene, Oregon, 97401

PROJECT PORTFOLIO

I have worked for 11 years Since I graduated from college. My major work is urban design and architecture design, mainly about commercial buildings.

PROJECTS

PERSONAL

DANCING

This is the biggest project in KUNMING city. It's called program No.1. The whole project is about conversion and re-utilization of a sports training base in the center of the city. The project area is 26 hectares, including a Football field and many other kinds of sports facilities. In the design, the government requires that we reserve the Tuodong Stadium and its sports attributes, and at the same time, improve the efficiency of land use as much as possible— We need to convert it into a mixed, multi-functional project with commercial, residential, entertainment and sports facilities.

TUODONG STADIUM

URBAN COMPLEX DESIGN

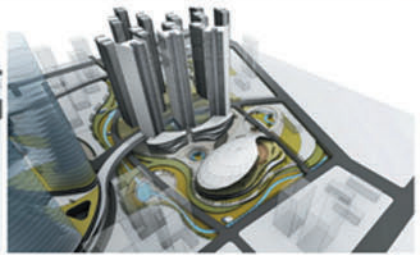

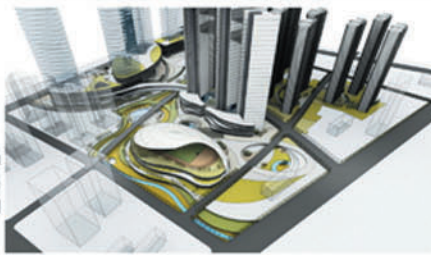

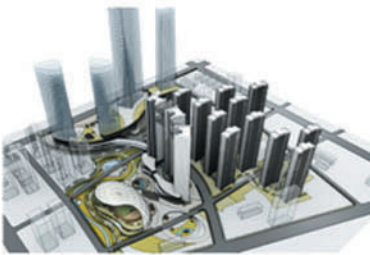

OVERALL FLORAGE : 2,500,000 SQM

VOLUME RATE : 9.8

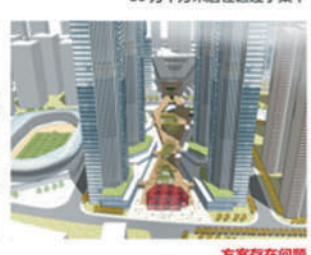

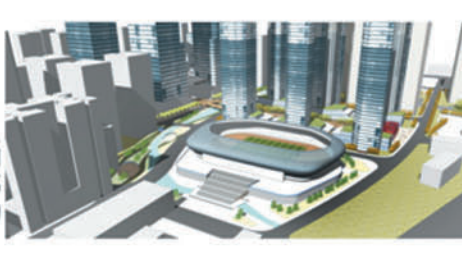

SITE AREA: 24 Ha

TIME: 2013~NOW

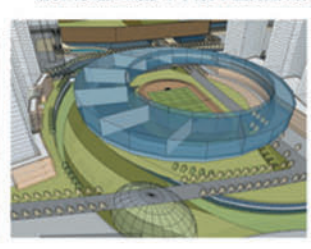

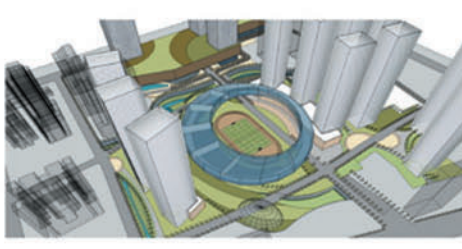

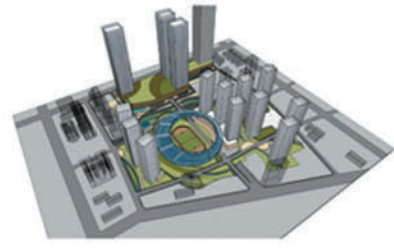

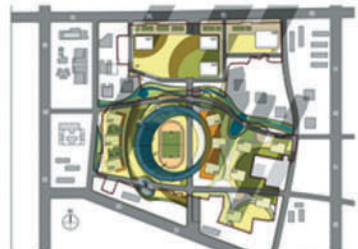

STAGE: SCHEME

方案存在问题
体育场偏离中心不利于交通疏散
80万平方米居住区过于集中

方案存在问题
内部路网过密，十字交叉口过多密集
沿东风路开口过多，不利于大型商业开发

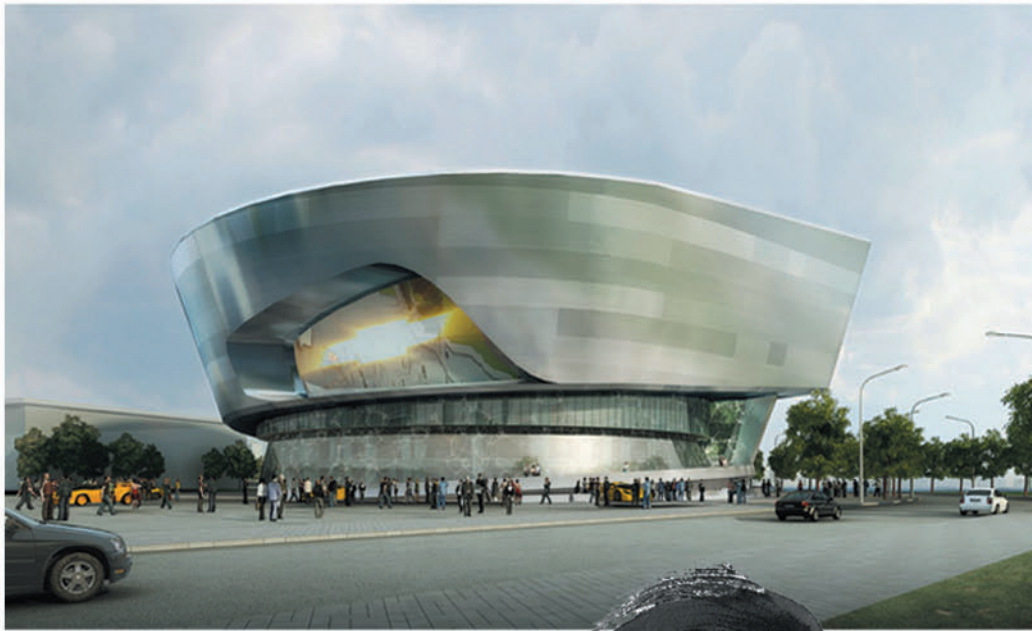

SHANGHAI 2010 EXPO

Shanghai 2010 Expo Saic-GM Pavlion is the one of the most big and improtant Pavlion in the EXPO site. The whole building fully embodies high technology and revolution of the company. Design inspiration comes from the industrial elements and nature. Our design includes the landscape, the building, the lighting, the show , almost everthing.
