

WGS and CMiS presents... *Quick Talks by Postdocs*

November 17th 3–4 pm

Hybrid • Zoom: (link will be sent on RSVP)

Location: Beethoven Seminar Hall, Knight Campus

Come learn about the amazing work done by **Lindsay Collins** and **Molly Keogh**, their journey through science, and career advice!

Neuroscientist Lindsay Collins studies how fluctuations in arousal and behavioral state can influence neural processing in mice. She received her PhD in Psychology from the University of Virginia and is currently a postdoc in the Institute of Neuroscience.

Geologist Molly Keogh studies coastal wetlands and how they respond to climate change, sea-level rise, and human activities. She received her PhD in 2019 from Tulane University and is currently a postdoc in Earth Sciences.
